LNV can be used to connect students to schools in other states, to experts/guest speakers (such as Senator Leahy), as well as to people around the world. Collaborations are typically free. For ideas on collaborations see the <http://vtlnv.pbworks.com>

Center for Interactive Learning and Collaboration  
www.cilc.org

Content for Students and the Content Dollar Bank

tips:

- create an account
- decide at the local level who is keeper of the CILC credits
- notify arlyn who should get the email about CILC credits
- look at the collaboration resources on the Inv wiki

The screenshot shows the homepage of the Center for Interactive Learning and Collaboration (CILC). The header includes the CILC logo, a blue award ribbon, and a 'Want More Benefits?' button. Navigation tabs are provided for 'CILC Consulting & Services', 'Professional Development', 'Content for Students', 'Resources', and 'About CILC'. A search bar is located below the navigation. The main content area features a 'Content Dollar Bank' banner with the text 'Lighten your workload while letting CILC maximize your dollars.' and a 'Want More Benefits?' banner with 'Register Or Renew Your Premium Service Plan'. A 'TANDBERG' advertisement is also visible with the slogan 'ONCE IN A LIFETIME EXPERIENCES. EVERY DAY OF THE WEEK. MY CLASSROOM IS THE WORLD.' and the tagline 'See: passion'. The footer contains a disclaimer: 'The Center for Interactive Learning and Collaboration, Inc. (CILC) was established in Indiana as a nonprofit corporation, and CILC has been previously recognized by the Internal Revenue Service as a tax exempt organization described in section 501(c)(3) of the Internal Revenue Code. CILC's sole member is Vision Athena, Inc., a section 501(c)(4) tax exempt organization. CILC and Vision Athena may jointly provide services under the name CILC.'

Scopia Desktop can be used with LNV terminals, with iView, or on its own.

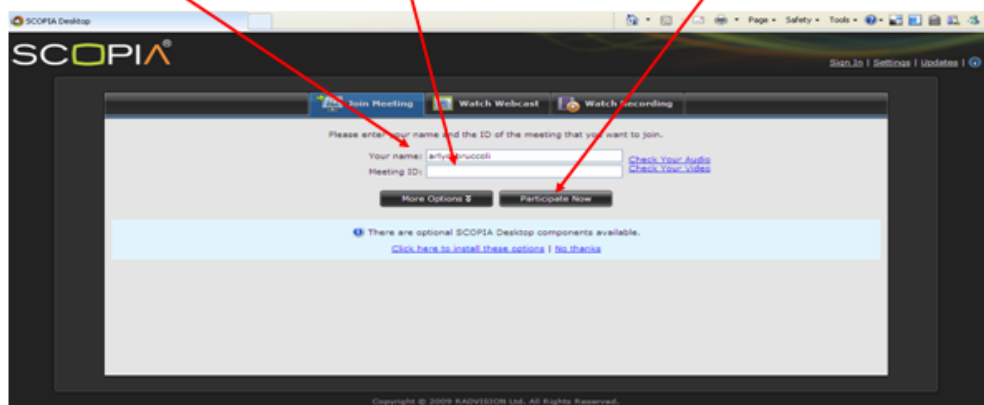

- When to use one system or the other depends on what a user is trying to achieve instructionally/meeting purpose etc.
- Practicing with Scopia Desktop will help users know the best ways to use these technologies.

To connect a webcam user to a LNV terminal you will need to create a meeting in iView that calls the LNV camera have the webcam user connect via Scopia.

#### Steps

1. login to iView and create a meeting with the LNV camera
2. give the Scopia set-up info and meeting number to the webcam user

2. give the Scopia set-up info: Instruct webcam participants to go to <http://conference.learn.vt.gov>  
Enter Name, the meeting ID number, & Participate Now.

The first time a user connects,  
Scopia will have her/him download the Scopia client.

# Thank You!

## Remember...HW

create a meeting with arlyn and the terminal doe-large to happen between midnight and 4 am within a week or so

and don't be afraid to ask  
arlyn
